

Digital ecosystem for carbon markets and climate action

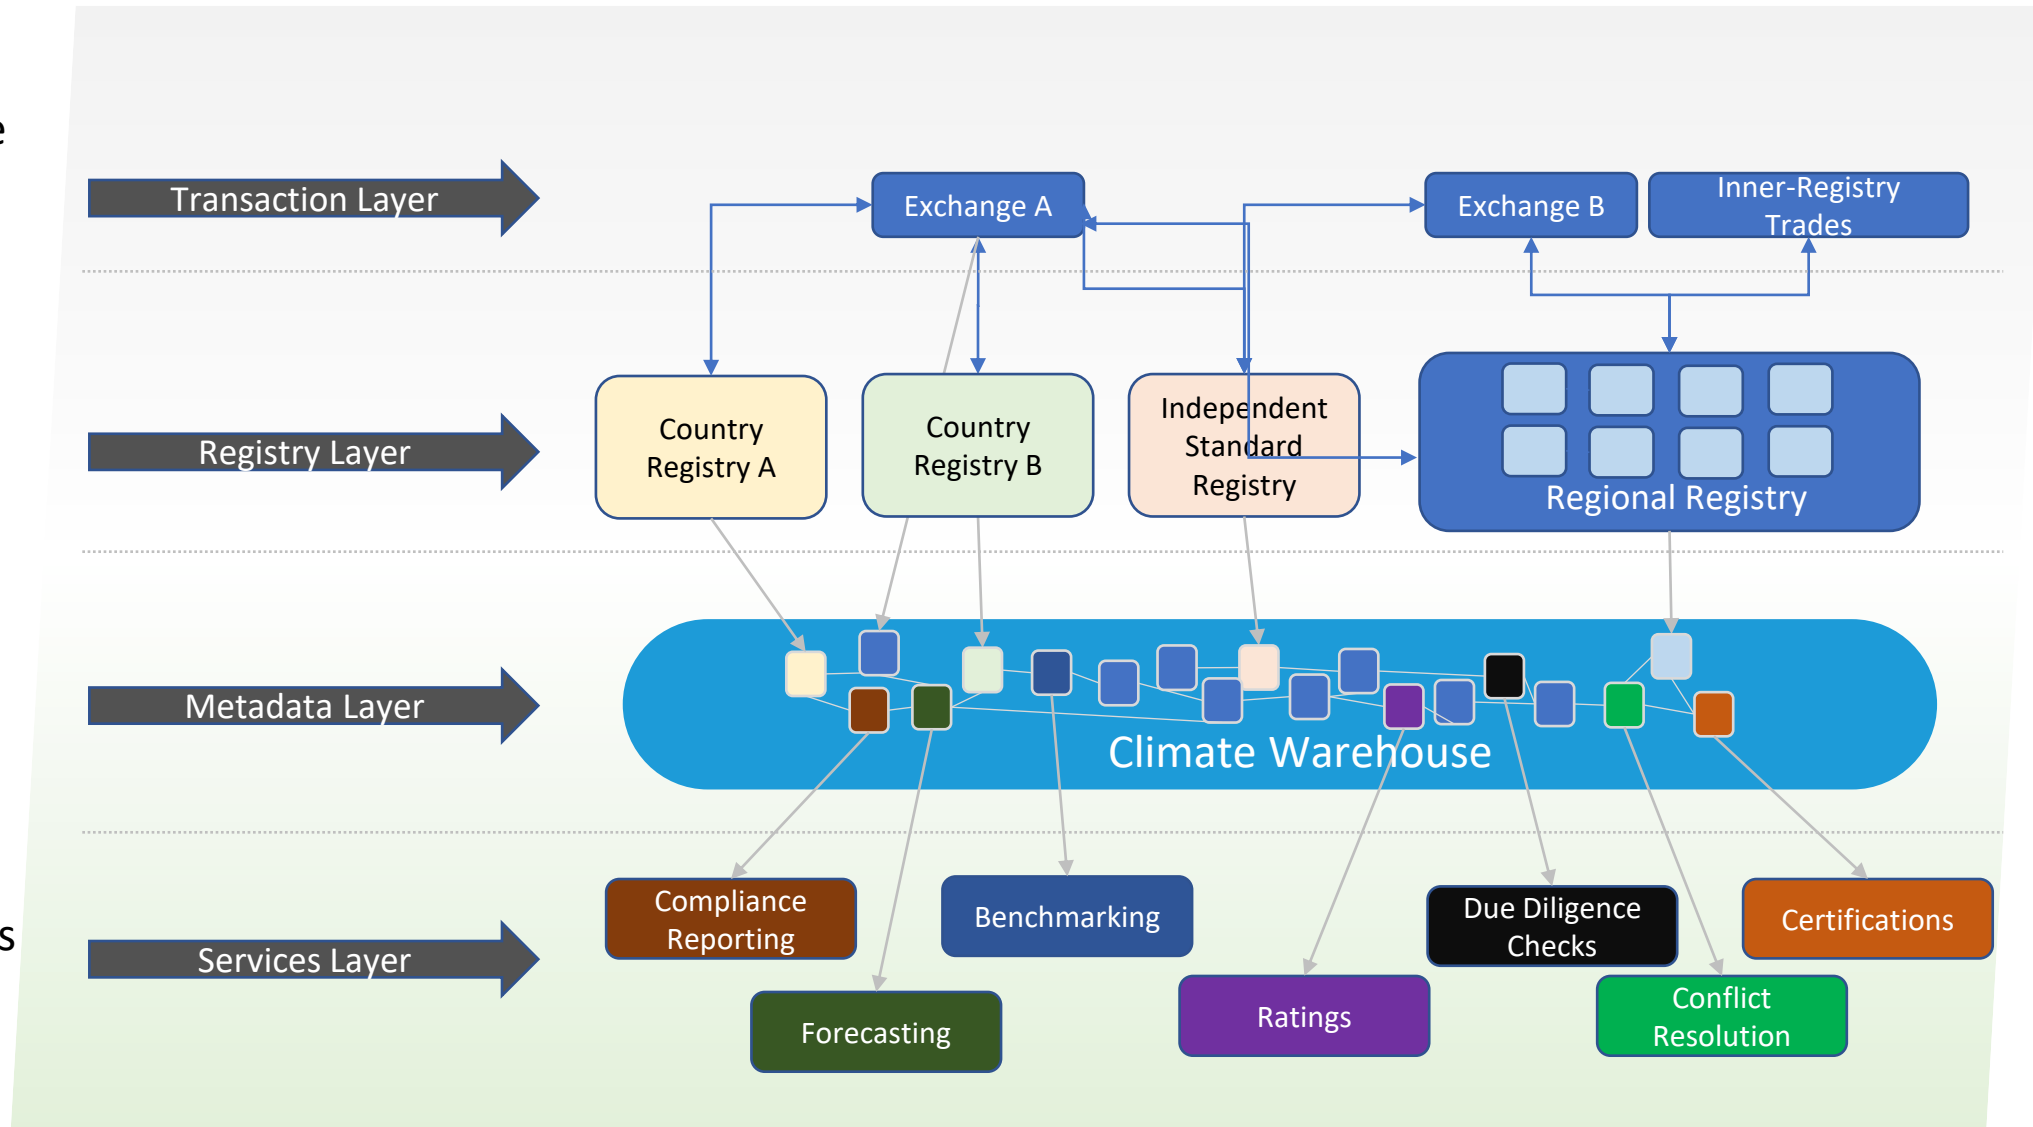

CONCEPT NOTE

V.11 APRIL 2022

This is a living document of work in progress that captures high-level conceptual designs of end-to-end digital ecosystems for carbon markets

The Climate Warehouse: Building a Public-Good Data Layer

- Designed as an open shared infrastructure layer
- Common taxonomy of data facilitates communication between entities
- Registry service providers and countries share data to the Warehouse
- Public and private sector market players can host a node and build out the service layer

End-to-end- digital ecosystem for carbon markets and beyond
